## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the mechanical fastener or an adhesive of claim 21 and the pillar of claim 33 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 32, 35-36, and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Barz et al. (6,467,834).

Barz et al. '834 disclose the claimed invention including a locating member (or end panel, not numbered but best seen in Figure 8) which includes a panel that overlays a surface of a reinforcement member. The locating member is integrally formed with the carrier member (Figure 8). The carrier member is preferably formed from injection molded plastics, such as nylon. The locating member functions as a baffle and physically substantially separates portion of the cavity from each other.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3612

5. Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barz et al. '834 in view of Blank (6,519,854).

Barz et al. '834 lack a sealant material disposed upon the locating member.

Blank (6,519,854) teaches placing sealant material upon a locating member.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided sealant material as taught by Blank upon the locating member of Barz et al. '834 in order to further encapsulate the reinforcement member within the structure and thereby strengthen the structure.

*Allowable Subject Matter*

6. Claims 21-27, 29-31, 39-44, and 46-49 are allowed.

7. Claims 33 and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Response to Arguments*

8. Applicant's arguments filed 1/25/06 have been fully considered but they are not persuasive. With regard to claim 32, the applicant directs the examiner's attention to column 4 of Barz et al. '834. On the examiner's copy of the reference, there is no mention of reference numbers 70, 72, or 74. Furthermore, none of the drawing figures appear to include these numerals. The examiner is confused as to what the applicant is referring. Perhaps the applicant is mistakenly referring to a different Barz et al. reference. Therefore, the rejection set forth above is maintained.

Also no replacement sheets & drawings were received w/ the last amendment (filed 1/25/06).

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
